

IMPORTANT: Please update your web browser

Date: 14 November 2018

Dear Valued Customers,

On **2 December 2018**, we will be upgrading our Personal Internet Banking services and websites to TLS 1.2 as necessary improvements to serve you better with a more secured banking experience.

If your web browser does not support TLS 1.2, you will not be able to view our web pages and use HSBC Personal Internet Banking services from 2 December 2018 onwards.

For continued access, please ensure that your web browser is TLS 1.2 compatible. For your convenience, we have listed below the web browser's versions which are TLS 1.2 compatible.

Should you require to **update your web browser** to a TLS 1.2 compatible version, please **click on the link below of your respective web browser**:

- [Google Chrome](#): Version 30 and above
- [Safari](#): Version 7 and above
- [Internet Explorer](#): Version 11 and above
- [Mozilla Firefox](#): Version 27 and above
- [Microsoft Edge](#): Version 12 and above

What is TLS?

Transport Layer Security (TLS) is an encryption standard that ensures secure connection between HSBC's database and web servers and the web browsers you use. This protection layer is applied whenever you visit our websites including Personal Internet Banking services.

Why TLS 1.2?

TLS 1.2 is more secure than its predecessors TLS 1.0 and 1.1, minimizes data breach risk and able to better protect our customer data.

For TLS 1.2 to work on your device, your web browser must be able to support it.

How to check your browser version?

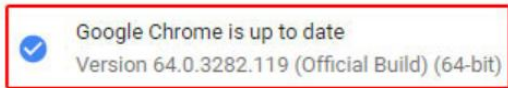

Most browsers may have automatically configured to support TLS 1.2. To check your web browser's version, kindly refer to the steps below:

Google Chrome

- Version check
 1. On your device, open Google Chrome.
 2. In the upper right-hand corner of the screen, click the  button.
 3. Click **Help** then **About Google Chrome**.

4. Your web browser version will be displayed in the information screen.

Safari

- Version check
 1. On your device, open Safari.
